Station Metrics

Current Flow: 15.9 cfs

30-Day Maximum: 32.3 cfs

30-Day Minimum: 6.7 cfs

30-Day Average: 18.4 cfs

Change from Previous: -17.9%

30-Day Trend: Decreasing

Prediction Confidence: High

Metric Explanations

Current Flow:
The most recent measured streamflow value in cubic feet per second (cfs)

Predicted Flow:
The forecasted streamflow for the next 30 days based on our prediction model

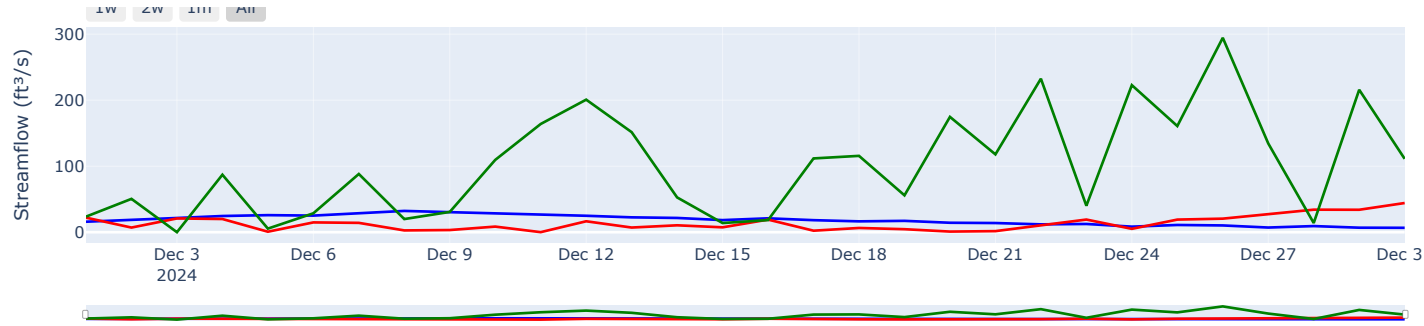

Change from Previous:
The percentage change in flow compared to the previous measurement

30-Day Trend:
The overall direction of flow changes over the next 30 days

Confidence Level:
Statistical confidence in the prediction accuracy (High: >90%, Medium: 70-90%, Low: <70%)
